

Caliphists' US Domestic Order Of Battle

The Rev. David R. Graham
Adwaita Hermitage
August 2014

The United States is under attack by several nation states. This essay assays the domestic order of battle of one of them: Caliphists. Details of Caliphists' US domestic order of battle are drawn from:

- data seen, read and overheard,
- observations inspired by direct experience and the sifting power of ratiocination, and by
- the military principle of expecting an enemy to do what they should do to defeat one.

The purpose of this essay is to join, at least, if not help initiate, a discussion of Caliphists' US domestic order of battle with a view to anticipating its use – certainly not far off (and here) – and defeating its execution.

The exercise should, of course, be moot because it is federal, not individual, responsibility to assess, decide and execute against an enemy nation state's order of battle.

However, the deep, solid antipathy of the multi-national and strongly Caliphist criminal conspiracy that overtook the administration of US federal power on 20 January 2009 to examining much less acknowledging – even less defeating – the Caliphist order of battle

drives the citizen responsibility to substitute the alien-inspired federal dereliction with civil intelligence.

Be prepared.

A Moslem is a Caliphist. Islam is one. Islam and Caliphism are one and the same. A Caliphist is a full-spectrum military-political-financial hegemon in battle mode. A Moslem is a combatant aiming to subdue everyone, by force of arms, in a single, world-wide totalism he or she calls Islam.

So we begin.

Every mosque in the USA – and the world – is a military installation. Every one is a war-fighting tactical operations center (TOC) and/or a regional or theatre war-fighting command and control center (C2). Every imam, mullah, ayatollah, muezzin, etc. is a military recruiter and/or commander in a chain of command or topping one. Every person in a mosque is an enemy combatant. Neither building nor member has a spiritual role or intent.

The religion of Islam is extinct since the early 20th Century. The religion of Christianity will be extinct by the middle of the 21st Century. The religion of Judaism is extinct since the 1st Century.

What passes for Islam, therefore, cannot be a religion. It is, rather, world-hegemonic ambition obtained and enforced by systematic sadism. What passes for Judaism or Christianity cannot be a religion either, but the

posture of the adherents of those extinct religions is not belligerent whereas the posture of the adherents of the extinct religion of Islam is.

So how does this ogress, Caliphism, organize herself and operate in the US?

On 20 June 2014 she volunteered the answer in a tweet comprising a picture of the Caliphist flag in front of the White House and these words:

#AmessagefromISIS toUS

We are in your state

We are in your cities

We are in your streets

You are our goals anywhere

She enlists support – on pain of annihilation – from her ogre counterparts in the USA political parties, principally but not exclusively the Democratic Party and principally but not exclusively aging harridans and their warlocks.

She has attracted to her service capable combatant commanders between and inside a long list of countries. Those commanders' military successes are multiplying exponentially since 20 January 2009, the day US military, diplomatic and financial stand-downs began as ordered by the multi-national and strongly Caliphist criminal conspiracy that overtook the administration of US federal power on that day.

Their successes attract volunteers to those commanders' formations. More military successes, more sanguine volunteers. Everyone loves a winner and no one a loser. And there is the element of blood-lust, blood-thirstiness driving especially but not only younger females and males to become Caliphists.

The ogress comprises a multi-headed monster having one purpose: global hegemony by way of success at arms. She is an army. Actually, several armies operating in several theaters. So far she has not conducted army-scale combat operations inside the United States, but she has done or should be assumed to have done everything she needs to do in preparation for doing exactly that.

World-wide and inside the US, she controls most conditions of a successful military force:

- dependable communications, to include finance
- skilled, decentralized military, diplomatic and propaganda leadership
- agile, adaptive and decentralized headquarters and headquarters staffs
- huge numbers of willing, multi-sourced war-fighters
- a complacent, centralized and unmindful enemy leadership
- superb fifth column capabilities
- mountains of stockpiled war materiel
- deep experience – after years of inserting embeds – of local customs, conditions and communications

- deep knowledge – through the embeds – of how rapidly to cause local, regional and national chaos at the flick of an order
- high and growing numbers of dispersed, battle-trained/hardened individuals and formations
- real armies conducting real battles as both combat operations and combat training
- public civilian air, land and sea transport made to serve as private military air, land and sea transport or weapons systems
- self-reinforcing resolve to maintain the posture of belligerence even in defeat and death

World-wide and inside the US, the condition of a successful military force the Caliphist monster does not control is industry. This deficiency affects her order of battle, placing acquisition of others' military and industrial assets high on her list of objectives.

All this we see directly, observe through the several media or reason out by penetrating seeming imponderables.

Now, what should one expect the Caliphist ogress to have done and to do in the US in order to defeat the US and subject the nation to her maw?

Already she should have:

- filled the minds of bureaucrats and politicians with thoughts of the beheading knife on one side and petrodollars on the other

- mapped jails and prisons, planned their takeover with release of Caliphists and tasked mosques near those facilities to execute that mission upon command or general sense that the time is right
- mapped stationary and movable military assets, planned their takeover and tasked mosques near those assets to execute that mission upon command or general sense that the time is right
- warehoused in every mosque and related storage facility at least one rifle, one handgun and one shotgun for every member of the mosque sixteen years and older
- warehoused at least a constant one thousand rounds for every rifle, handgun and shotgun warehoused
- used existing or constructed above or under ground shooting ranges and compelled every mosque member sixteen years and older to become a marksman
- subsidized at least one male member, sixteen years or older, of every mosque member family to undergo a minimum two-year military training in one or more of the Caliphist armies conducting active operations
- identified, preferably but not only near human habitations, ignitable flora that will conflagrate rapidly, developed plans to ignite them and tasked mosques near those conditions to execute that mission upon command or general sense that the time is right
- mapped the US electrical grid, designated key nodes to be destroyed, and how, and tasked mosques near those nodes to execute that mission upon command or general sense that the time is right
- mapped the back-up power system of hospitals and police stations, developed plans to destroy them and tasked mosques near those

hospitals and police stations to execute that mission upon command or general sense that the time is right

- mapped the back-up power system of municipal, county, state and federal buildings, especially those housing IT assets and aviation, law enforcement and civilian regulating personnel, developed plans to destroy them and tasked mosques near those buildings to execute that mission upon command or general sense that the time is right
- mapped ground transportation infrastructure – road and rail – the destruction of which would cause maximum rapid collapse of ground communications, especially for foodstuffs, heavy equipment and petrochemicals, developed plans to destroy them and tasked mosques near those infrastructures to execute that mission upon command or general sense that the time is right
- mapped media headquarters facilities and personnel, developed plans to destroy them and tasked mosques near those facilities and personnel to execute that mission upon command or general sense that the time is right
- mapped internet server farms and trunk lines, developed plans to destroy them and tasked mosques near those farms and trunk lines to execute that mission upon command or general sense that the time is right
- identified potential mass execution-burial sites for federal, state, county and municipal bureaucrats and politicians, lawyers, medical doctors, teachers, artists, journalists, writers, Jews, Christians, Copts, Atheists, Mormons, Wiccans, Hindus, Buddhists and Baha'is, designated infrastructure to transport those individuals to those sites and tasked mosques near those sites and infrastructure to

execute that mission upon command or general sense that the time is right

- made plans to compel food growers, distributors and retailers to remain in operation for Caliphist-approved commodities and tasked mosques near those operators to execute that mission upon command or general sense that the time is right
- made plans to destroy churches, synagogues, temples, meeting halls, prayer houses, colleges, monasteries, universities, wine vineyards, distilleries, brewmasters and libraries together with their contents and personnel and tasked mosques near those institutions to execute that mission upon command or general sense that the time is right

And when the time is right she must:

- execute plans already prepared pretty much in the order shown above, excepting that take over of US military assets would most easily proceed following general destruction of communications infrastructure
- allow to disseminate only news of her triumphs
- be hyper-ruthless and unthinkably savage
- release Caliphists from jails and prisons and kill others there
- overtake US military facilities to take over US military assets, including the five national military academies
- overtake and take over precious metals stockpiles in US vaults
- replace US banking system with a Caliphist one
- denounce and replace US institutions, laws and treaties with Caliphist ones
- annihilate voluntary organizations, seize their properties and kill their personnel

- offer the rich and affluent to hand over their property or their lives

Were I a Caliphist, I would argue for that order of battle. If I have performed my duty -- to see, to reason and to report -- that it already is. Were I an American, and I am, and were I responsible for the conduct of the nation's affairs, and I am not, I would take the foregoing assay of Caliphists' US order of battle as a prime factor for developing my own order of battle and correlating missions against the Caliphist monster.

Domestically, I think the central concept and goal of my order of battle and correlating missions would be, preempt. Hard, fast and total preempt. And I would give the order to execute those missions because the time is right to do just that.

Multi-nationally, I think the central concept and goal of my order of battle and correlating missions would be, annihilate. I would apply overwhelming military, diplomatic and financial power against ISIS and her supporting nation states, including Saud, in a manner to be determined by my military, diplomatic (for diplomatic, not military, combat) and financial (for financial, not military, combat) advisers, who would concur with me in the foregoing assay of the Caliphists' nature and order of battle, domestic and multi-national. And I would give the order to execute those missions because the time is right to do just that.
