AH OPORD 2009-05-04, Fight The Devil (Lifetime)

1. **SITUATION**

General. During the period of embodiment in a finite frame, individuals and groups are beset by the devil. The word devil is a symbol which personifies the phenomenon of evil. Evil is powers of being self-separated, or so it seems, from the Ground of Being, from God, and trying to create anti-being, setting themselves against God, against unity. Because the world or finitude as is is good, including embodiment in a finite frame, fighting the devil or evil is a necessary and inescapable component of life.

2. **MISSION**

Individuals and groups, but especially individuals, will find, fix, finish, exploit and analyze the devil, driving hurt and harm from the world. This is a life-long mission that does not end even at death.

3. **EXECUTION**

a. Concept of the Operation: Evil causes hurt and harm in precisely the amount and extent God has a purpose in allowing it to do so, no more and no farther. Since God's purpose is protection of the righteous and destruction of evil doers, mission execution will proceed on the assumption that operators will not be beset beyond their ability to fulfill the mission.
