Life Control

Let me get this straight.

The “health care” plan of the semi-Kenyan’s looters afflicting the US Government will be written by a committee whose head says he doesn't understand it, passed by a Congress that hasn't read it and whose members will be exempt from it, signed by a fraudulent “president” who is queer and smokes, funded by a treasury chief who does not pay his taxes, overseen by a surgeon general who is obese, and financed by a country that is broke.

What could possibly go wrong?
